Jung and the Postmodern Christopher Hauke

2013-10-23 What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.

Securing Outer Space Natalie Bormann

2009-01-30 The challenges that space poses for political theory are profound. Yet until now, the exploration and utilization of space has generally reflected - but not challenged - the political patterns and impulses which characterized twentieth-century politics and International Relations. This edited volume analyses a number of controversial policies, and contentious strategies which have promoted space activities under the rubric of exploration and innovation, militarization and weaponization, colonization and commercialization. It places these policies and strategies in broader theoretical perspective in two key ways. Firstly, it engages in a reading of the discourses of space activities: exposing their meaning-producing practices; uncovering the narratives which convey certain space strategies as desirable, inevitable and seamless. Secondly, the essays suggest ways of understanding, and critically engaging with, the effects of particular space policies. The essays here seek to 'bring back space' into the realm of

International Relations discourse, from which it has been largely removed, marginalized and silenced. The various chapters do this by highlighting how activities in outer space are always connected to earth-bound practices and performances of the every day. Securing Outer Space will be of great interest to students of space power, critical security studies and IR theory.

Freud on the Psychology of Ordinary Mental Life Susan Sugarman 2010-06-16 Freud, although best known for his elucidation of the unusual in human mental life, also attempted to illuminate ordinary human experience, such as peopleOs appreciation of humor, their capacity to become engrossed in fiction, and their disposition to a variety of emotional experiences, including the uncanny, the stirrings prompted by beauty, and their disposition to mourn. His insights into the everyday and his sense of where within it the productive questions lie reveal an incisiveness that defies both earlier and subsequent thought on his topics. This book

works to expose that vision and to demonstrate its fertility for further inquiry. It reconstructs several of Freud's works on ordinary mental life, tracking his method of inquiry, in particular his search for the child within the adult, and culminating in a deployment of his tools independently of his analyses. It shows how to read Freud for his insight and generativity and how to push beyond the confines of his analyses in pursuit of new lines of exploration.

The Capable Cruiser Lin and Larry Pardey

2010-06-08 Lin and Larry Pardey have now been cruising on board their own boats, racing, delivering, and repairing other people's boats for more than 44 years. After west-to-east and east-to-west circumnavigations, and voyages to more than 75 countries, they have a breadth of knowledge that few other boating authors possess. Most of the voyaging has been done on an earn-as-you-go budget that could be well within the reach of the majority of those whose dream is to set sail. Their motto? "Go small, go simple, but go now!" The Pardeys' strengths are neatly symbolized by the boats they have built. Each one is romantically traditional, with swooping sheerlines, and is completely dependent on the wind. And yet each boat carries the best, strongest, and most seamanlike gear. Like their vessels, the Pardeys' writings are founded on a marriage of the spirit of romantic adventure and the practical, up-to-date seamanship that keeps them and their boats safe. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: sixteen ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment; repairing rigging at sea. All of the original chapters have been updated to ensure that the information will be helpful for everyone who dreams of cruising—whether now or soon. The Capable Cruiser is a logical extension of the Pardeys' The Self-Sufficient Sailor, with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick,

former editor of Cruising World magazine, to label Lin and Larry Pardey "the enablers."
