The Modern House Jonathan Bell 2015 The modern House reflects upon the complicated relationship architecture has with the terms "Modernist", "Modernism" and "Modern" specifically in relation to the potent concept of the home, reflecting in part the narrative of how some of the most important examples of Modern houses were commissioned and built in the UK. These special examples of British Modernism include such progressive experiments on communal urban living as London's Isokon Building, completed in 1934 by eminent architect Wells Coates, and Berthold Lubetkin's Highpoint, which is today considered one of the most prominent examples of the early International Style. Compared with these urban enclaves are private houses, such as the Laslett House in Cambridge, 1958, by the architect Trevor Dannatt, or the Winter House, designed by John Winter as his own residence. Included are an extended introductory essay by acclaimed architectural journalist Jonathan Bell, former architecture editor for *Wallpaper** and contributing editor at *Blueprint*, and projects such as those designed by renowned architect Carl Turner, responsible for the low energy Slip House, a cantilevered sculptural abode of translucent glass, steel and concrete. With images of yet to be seen interiors and restorations, *The Modern House* illuminates the convergent characteristics of functionalism, truth to materials, flowing space and natural light within the Modern home as a space for living.

Disruptive Fintech James Deitch 2019-12-16 Throughout history, innovators have disrupted existing financial services norms to change the landscape of the marketplace. The author then looks toward the future of fintech and the forces of disruption that will change the landscape of financial life as we know it. Using over 100 interviews with thought leading CEOs, this book develops a methodology to identify financial services that are ripe for innovation and discusses how innovative thinking can be used as a disruptive weapon to attack incumbents and create effective new fintech models. The book discusses How to relate historical innovations and disruptions in financial services to the current landscape How to follow a process to identify the threats facing incumbent processes and businesses, and how innovative thinking can be used as a disruptive weapon to attack incumbents and create effective new fintech models How many fintech innovations will be constructed by re-arranging or re-purposing existing core processes In this insightful book, author James Deitch, CPA CMB, argues that some of today's high-flying fintech innovators will flourish, but many may perish as the fire of innovation consumes those fintechs that are slow to monetize their promises.
